🔑 swathi5678

Nov 2022 – Apr 2026
Chennai, India

EDUCATION

Bachelor of Engineering(B.E) - Computer Science Engineering with Cybersecurity(CSE-CS)

SRM Easwari College of Engineering

- Current Cumulative Grade Point Average (CGPA) - 8.93 / 10

PROFESSIONAL EXPERIENCE

Artificial Intelligence Engineer Intern, Infosys Springboard

Dec 2024 – Feb 2025

Chennai, India

- Developed predictive models (Logistic Regression, Random Forest, XGBoost) for lung cancer risk analysis, improving early detection accuracy by 25%.
- Built a real-time medical dashboard, enhancing patient triage efficiency by 30% with risk-based prioritization.
- Automated appointment scheduling using Google Calendar, reducing manual booking time by 50%.

Data Analysis Intern, Roca Bathroom Products Private Limited

Jan 2025 – Feb 2025

Chennai, India

- Automated sales reporting with Jupyter Notebook, enabling real-time insights and reducing manual effort.
- Implemented time series forecasting and customer segmentation, improving sales strategy.
- Reduced manual effort by 80% with automated sales reporting and improved inventory management by 30%, boosting sales efficiency.

PROJECTS

Lung Cancer Risk Prediction | Machine Learning, XGBoost, Random Forest, Python, Scikit-Learn

- Conducted data cleaning, feature engineering, and predictive modeling to analyze cancer risk factors.
- Developed models to identify high-risk patients based on various medical parameters.
- Addressed class imbalance and optimized model performance for accurate patient risk classification.

Graph-Based Fraud Detection Engine | Python, Graph, Pandas, NetworkX, Streamlit

- Designed and implemented a modular graph-based fraud detection prototype modeling cards and merchants as nodes in a directed network.
- Built a data ingestion and preprocessing pipeline using Pandas with schema validation and unified transaction timelines.
- Developed structural risk detection algorithms including degree centrality (refund hub detection), cycle detection (DFS), temporal clustering, and entropy-based channel analysis.
- Implemented a configurable weighted risk scoring engine (0–100 scale) to combine multiple fraud signals into interpretable outputs.
- Designed the system with scalability in mind, enabling portability to distributed graph frameworks (e.g., Spark GraphFrames, Neo4j).

SKILLS

- **Programming Languages:** Java, Python, Spring(basic)
- **Artificial Intelligence & Data Science:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn
- **Databases:** MongoDB, SQL
- **Cybersecurity:** Cybersecurity Fundamentals, Wireshark, Nmap
- **Computer Science Fundamentals:** Data Structures, Algorithms, Computer Networks, OOPS

COURSES & CERTIFICATIONS

- Cisco Certified Network Associate (CISCO Netacad)
- Introduction to Cybersecurity (CISCO Netacad)
- Google Cybersecurity Professional Certificate
- Introduction to industry 4.0 and industrial internet of things (ELITE)
- Artificial Intelligence Primer Certification (Infosys)

PROBLEM SOLVING

- Solved 300+ Leetcode problems
- Solved 100+ challenges in pwn college, Arizona State University

EVENT ORGANISATION

- Organized and assisted in successfully conducting our Department Symposium.
- Event Organizer of Null Chennai Student Chapter - Easwari.
- Contributed to CTF creation and successfully organized and coordinated CTF events, enhancing participant engagement and cybersecurity awareness.
